

August 22, 2022

Dear Family of Creative and Performing Arts School,

We hope you are having a safe, healthy, and enjoyable summer! This letter provides an update on the BAS Replacement project at Creative and Performing Arts. We are happy to announce that we have made significant progress throughout the summer and will continue on this trajectory after school resumes.

Over the summer months, our construction team was hard at work and able to complete the Installation of a new HVAC Control System.

To plan for the beginning of the year, the District has temporarily suspended all indoor construction activities at your school as of Monday, August 15, to allow for the final cleaning of the school and ensure the staff and students can prepare for the new school year. However, we will be conducting a demonstration of the new system operation and Training of SDP Personnel in the use of the equipment and software after Labor Day.

The Office of Capital Programs is committed to taking all the steps necessary to ensure that the school is safe and that the health of our students and staff remains a top priority. If you have any additional questions or concerns, please email us at capitalprograms@philasd.org, or call 215-400-4730.

Sincerely,

Nicole Ward, AIA, NCARB

Acting Executive Director
School District of Philadelphia | Office of Capital Programs
